

Facelift and Skin-Firming Treatment

Acupuncture combines
with multi-polar RF light and Ultherapy

- **Acupuncture:** rejuvenates skin and tissues, eliminates blockages in facial meridians and nourishes them thoroughly.
- **RF Light:** provides special heat and energy directly to deep skin layers; resolves proliferation of toxic fatty "Phlegm" cells and enhances skin elasticity.
- **Ultherapy:** stimulates elastin and collagen production, lifts and tightens skin and reduces wrinkles.
