

**Elizabeth Wang Acupuncture
Top Herb LLC**

Weight Loss/ Body Sculpting

**Combines acupuncture, 40K cavitation multi-polar
RF frequency and 635 Lipo Laser**

- **Acupuncture:** activates Qi (vitality) and unblocks channels in the body. Improves metabolism and balances the hormone system.
- **40k Cavitation:** breaks down and eliminates subcutaneous fat. The broken lipocytes are safely metabolized and eliminated from the body assisted by increased water intake.
- **Multipolar RF Frequency:** also known as diathermy, which is a system that generates heat from the inside of the body. It promotes fat dissolving and lymphatic drainage, enhances skin elasticity, tightens and firms loose skin.
- **635 nm Diode Lipo Laser:** stimulates fat cell membranes. The fat cells reduce in size and their intracellular contents are released with no harmful physiological effects.

How does the treatment feel?

Most clients consider the procedure painless and comfortable. There may be slight discomfort from the resonance in the ears, but it is harmless and disappears as soon as you are not in contact with the applicator.
